# Int 21H, AH=33H, AL=05H

## Version

4.0 and higher

## Brief

GET BOOT DRIVE

## Family API

## Input

```
AX = 3305h
```

## Return

DL = boot drive (1=A;,...)

## Macro

## Notes

This function does not use any of the DOS-internal stacks and may thus be called at any time. It is directly dispatched from the INT 21h entry point with interrupts disabled.

NEC 9800-series PCs always call the boot drive A: and assign the other drive letters sequentially to the other drives in the system this call is supported by OS/2 Warp 3.0, but not earlier versions of

OS/2; it is also supported by Novell DOS 7
