

linklib

The names of one or more libraries and object files. Use this field to supply object code needed to resolve dynamic-link calls. Separate file names with spaces.

BIND automatically searches for API.LIB and OS2.LIB. If you want additional libraries, be sure to specify the full path name.

options

BIND options must appear last on the command line. You can specify options in uppercase or lowercase and use a single letter or the full option name. For example, /M, /m, /MAP, and /map are equivalent.
