Download the Latest Files

Most of osFree's files are currently available from our ftp://osfree.org/pub/downloads/. osFree is currently a deep alpha stage project. You can test some packages and/or you can browse the sources. You can also access the Git repository directly at our repository through your preferred Git client. GitHub has more information about accessing it through Git. However we have information about it as well.

There is our Demo CD available too.
